

HANNA BIN LIFT

For our biggest machine model T240 there is a small bin lift available as an option – the Hanna bin lift. Using bins will make the handling and transportation of the food waste from the kitchen to the machine so much easier! The Hanna bin lift is manufactured for 80 litre Plastic Omnium bins only.

CAPACITY

The Hanna bin lift is designed for 80 litres Plastic Omnium bins only.

Capacity: 100 kg

Electricity: 220 volt, 1-phase, 6 A

The bin lift is anchored in the floor with expander bolt (4pcs. 8X100 mm).

BIN SPECIFICATION

The required bin is a "80 litre bin DIN CEN A" from Plastic Omnium.

OPERATION

Place the bin in the bin lift.

The operator lifts the actuator from its holder and places him/herself outside the risk area. (The risk area shall be clearly marked on the floor around the bin lift, see drawing in technical information.)

Turn the key switch towards the mark 'UP' and press the 'START' button. Let the bin lift do the emptying movement. After, turn the key switch towards the mark 'DOWN' and press the 'START' button.
