Compost Locally

BIGHANNA™
composter

VERTAL inc.

FOR LOCAL COMPOSTING OF FOOD WASTE FROM 75 TO 1200 KG PER WEEK

The Big Hanna Composter is usually installed in housing areas, blocks of flats, restaurants, hotels, conference centers, catering services and hospitals - in fact anywhere that generates food waste. The five Big Hanna models available have capacities varying between 75-1200 kg per week..

FROM FOOD WASTE TO FERTILIZER WE WILL GUIDE YOU!

Composting with Big Hanna is simple, economical and requires minimal maintenance. We can advise you where to install your Big Hanna, how to handle your waste and what to do with your compost. We offer comprehensive support by providing on site training, visits, telephone and email support.

5 DIFFERENT MODELS

Big Hanna composters are available in five different models. Temperature sensors are standard on models T60-T240. Shredder is optional on models T60-T120. Bin lift for 80 liter standard bins is optional on model T240. Internet Logging Control is available with all models

Model T40

Food waste: 75-100 kg/week
Number of households: 25-35
Number of meals per day: 100 à 140
LxWxH: 1995x885x1515 mm
Volume: 0,61 m³

Model T60

Food waste: 150-250 kg/week
Number of households: 55-70
Number of meals per day: 200 à 360
LxWxH: 2400x1080x1550 mm
Volume: 1,07 m³

Model T75

Food waste: 225-325 kg/week
Number of households: 70-90
Number of meals per day: 320 à 470
LxWxH: 2900x1080x1550 mm
Volume: 1,30 m³

Model T120

Food waste: 300-500 kg/week
Number of households: 90-135
Number of meals per day: 430 à 715
LxWxH: 3900x1080x1550 mm
Volume: 2,00 m³

Model T240

Food waste: 400-1200 kg/week
Number of households: 130-300
Number of meals per day: 570 à 1715
LxWxH: 5300x1400x1800 mm
Volume: 4,00 m³

MASTERING COMPOSTING PROCESS THE EASY WAY

Food waste is loaded at the front of Big Hanna and compost is automatically discharged to the rear. Big Hanna's unique, fully enclosed "flow through" system will hygienically process all food waste including fish and meat. Big Hanna supports the naturally occurring micro-organisms that decompose food waste by automatic aeration and rotation. The biological activity will reduce the volume of the waste by up to 90% and convert it into compost.

AVOID POLLUTION FROM LANDFILL GAS AND TRANSPORT EMISSION

By composting "on site" with Big Hanna you can solve your food waste problems responsibly, economically and ecologically. It's the greenest solution to food waste! Composting locally with Big Hanna reduces transport and greenhouse gas emissions. It will also help reduce landfill emissions. You get the users to participate in an environmental friendly action.
