

# BIGHANNA<sup>™</sup> composter

## DRAINAGE CARTS

Food waste from restaurants and canteens is often quite wet. All material should, if possible, be drained from excess water. For canteens, we can offer a cart to facilitate the drainage and handling of the food waste. The principle is quite simple – we put the wet food waste in one bucket, with drainage holes in the bottom, and let another bucket below capture the excess water coming from the food waste.

**CART (2+2) x 25 liter**  
**Approx.**  
**6.6 GALLONS PER BUCKET**

The capacity of this cart is 50 litres (approx. 13 gallons) of food waste per day. Each bucket holds 25 litres (approx 6.6 gallons) and can be easily lifted from the cart. The buckets are also easy to clean.

Width: 620 mm (approx 25")  
Depth: 400 mm (approx 16")  
Height: 670 mm (approx 27")

**CART (4+4) x 10 liter**  
**Approx.**  
**2.2 GALLONS PER BUCKET**

The capacity of this cart is 40 litres (approx. 10.6 gallons) of food waste per day. Each bucket holds 10 litres (approx. 2.6 gallons) and can be easily lifted from the cart. The buckets are also easy to clean.

Width: 950 mm (approx 38")  
Depth: 310 mm (approx 12")  
Height: 860 mm (approx 34") including handle.

**CART (2+2) x 25 liter**  
**Approx.**  
**6.6 GALLONS PER BUCKET**

**CART (4+4) x 10 liter**  
**Approx.**  
**2.2 GALLONS PER BUCKET**
