

# BIGHANNA™ composter

## SLIDING HATCH

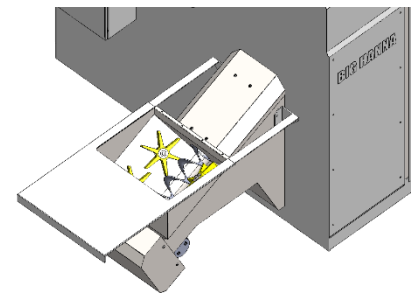

The sliding hatch will be of great use when feeding food waste from an auger positioned above the infeed hopper of Big Hanna, since a regular hinged lid could hit the auger when opened.

The sliding hatch is available for 20-gallon hoppers on the Big Hanna models T240, T480 and Neter12 to Neter36.

Please note that the installation site needs to be approx. 600 mm (23.6") longer than normal.
